DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 21-22, 26-28, 32, 36, and 39-40 in the reply filed on 6/29/09 is acknowledged. The traversal is on the ground(s) that some of the subject matter already receive an action and that there is a burden of cost. This is not found persuasive because there old claims were canceled and subject matter not previously dealt with incorporated different species of the invention which are distinct. Cost is a concern; however, it cannot be a driving force in determining one way or the other how the procedures are applied.

The requirement is still deemed proper and is therefore made **FINAL**.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 21-22, 26-28, 32, 36, and 39-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Roodt (6789289).

Roodt discloses an arrangement or wiper system having a wiper blade (24), a catch hook (62), an arm (10), plug in axis (22), and bushing (50). In regard to claims 26-28 this is true based on the fact that installation and operation are going to be two different positions. In regard to claims 32, 36, and 39-40, this will be true based on the fact the de-installation and operating positions are going to be different. These claims recite many can be and that means that it may or may not even be required.

Allowable Subject Matter

3. The following is a statement of reasons for the indication of allowable subject matter: Figure 1 recites a potentially patentable device but the structure and orientation of each element 14, 18, and 20 needs to have shapes defined and orientation of the body and positioning of the hook and the direction the hook is pointing because most of the prior art is reverse of what application is showing..

Response to Arguments

4. Applicant's arguments filed 6/14/05 have been fully considered but they are not persuasive.

a. The restriction has been responded too. The claims have been rejected and it seems a lot of function language is relied upon as well. The applicant is welcome to set up an interview by contacted the examiner by email to set up a time Lee.Wilson@uspto.gov.
